

TechCorp Internal Employee Handbook

Version 3.2 | Updated January 2025

1. Company Overview

TechCorp was founded in 2010 and is headquartered in Bangalore, India. The company builds enterprise software products for the banking and insurance sectors. TechCorp currently employs over 1,200 people across offices in Bangalore, Mumbai, and Hyderabad.

The company mission is to simplify complex financial workflows using modern technology. TechCorp products are used by over 300 banks and financial institutions across South Asia.

2. Leave Policy

2.1 Annual Leave

All full-time employees are entitled to 20 days of paid annual leave per calendar year. Leave entitlement is pro-rated for employees who join mid-year. Annual leave must be applied for at least two weeks in advance through the HR portal. Unused leave of up to 10 days can be carried forward to the next calendar year. Leave beyond 10 days will lapse at the end of December.

2.2 Sick Leave

Employees are entitled to 10 days of sick leave per year. Sick leave does not require advance notice. For sick leave exceeding 3 consecutive days, a medical certificate from a registered doctor must be submitted to the HR department within 5 working days of returning to work. Unused sick leave cannot be carried forward or encashed.

2.3 Maternity and Paternity Leave

Female employees are entitled to 26 weeks of paid maternity leave as per the Maternity Benefit Act. Male employees are entitled to 5 days of paid paternity leave, which must be taken within 30 days of the child's birth. Adoption leave of 12 weeks is available for primary caregivers adopting a child below the age of 3 months.

3. Deployment Process

3.1 Code Review

All code changes must be submitted via a pull request on the internal GitLab instance. Every pull request requires a minimum of two approvals from team members before it can be merged. The author of the pull request cannot approve their own code. Reviews must be completed within 2 working days of the pull request being raised.

3.2 Deployment Schedule

Production deployments happen every Friday between 2pm and 5pm IST. Emergency hotfixes can be deployed on any day with approval from the Engineering Manager and the Head of DevOps. All deployments must be accompanied by a deployment checklist filled out in the deployment tracker spreadsheet. Rollback procedures must be documented before any deployment begins.

3.3 Environment Overview

TechCorp maintains three environments: Development, Staging, and Production. Developers can deploy freely to the Development environment. Staging deployments require one approval and are used for QA testing. Production deployments require two approvals and must follow the Friday deployment schedule unless it is an emergency hotfix.

4. Onboarding Process

4.1 First Week

New employees must complete the security awareness training module within the first week of joining. This training is available on the internal learning portal at learn.techcorp.internal. Completion of the training is mandatory and access to production systems will not be granted until the training is marked complete.

4.2 Laptop Setup

The IT department will provide a laptop on the first day of joining. The laptop setup guide is available on the internal wiki at wiki.techcorp.internal under the IT section. If you face any issues with laptop setup, contact the IT helpdesk at it@techcorp.com or raise a ticket on the IT portal. The IT helpdesk is available from Monday to Friday between 9am and 6pm IST.

4.3 System Access

Access to internal systems is provisioned by the IT department based on your role. Your manager must raise an access request on the IT portal specifying the systems required. Standard access to email, GitLab, Jira, and Confluence is provisioned automatically on the first day. Access to production databases requires additional approval from the Security team.

5. Performance Review

5.1 Review Cycle

TechCorp conducts performance reviews twice a year. The mid-year review happens in July and the annual review happens in December. Employees are evaluated on four dimensions: technical skills, delivery quality, collaboration, and learning and growth. Each dimension is rated on a scale of 1 to 5.

5.2 Promotion Criteria

Promotions are considered during the annual review in December. To be eligible for promotion, an employee must have completed at least 18 months in their current role and must have received a combined performance score of 4 or above in the last two review cycles. Final promotion decisions are made by the department head in consultation with HR.

6. IT and Security Policy

6.1 Password Policy

All employee passwords must be at least 12 characters long and must include uppercase letters, lowercase letters, numbers, and special characters. Passwords must be changed every 90 days. Employees must not reuse the last 5 passwords. Using the same password for internal systems and personal accounts is strictly prohibited.

6.2 Data Handling

Customer data must never be stored on personal devices or shared via personal email accounts. All customer data must remain within TechCorp approved systems. Transferring customer data outside the organization without written approval from the Security team is a disciplinary offence. Employees who discover a data breach must report it to security@techcorp.com within one hour of discovery.

6.3 Remote Work

Employees working remotely must connect via the company VPN before accessing any internal systems. The VPN client can be downloaded from the IT portal. Personal wifi networks are permitted for remote work but public wifi hotspots must not be used to access company systems without VPN. Any security incidents while working remotely must be reported to the IT helpdesk immediately.
